

**2020 POS  
Point of Sale Solution**

- Increase margins
- Lower operations costs
- Improve speed of service
- Increase customer satisfaction

**Redefining Restaurant Management**

## 2020 Dynamic Kitchen Prep

### “The New Gold Standard”

2020 ITS goes beyond the traditional standard of creating prep charts based on the day’s start up forecast. 2020 ITS provides this traditional information through printed Prep Charts to start the day. However, based on real experience 2020 ITS goes a step further and provides an on screen prep chart that adjusts to real changes in actual compared to the forecast.

The 2020 Dynamic Kitchen Prep display will increase or reduce the recommended prep amounts based on real data. Adjustments insure

- **Beginning of day prep amounts based on historical quantities sold for the same time period, for the same day of the week, for previous weeks, using yield calculations**
- **The yield is used with the current day’s sales forecast to develop the anticipated prep amounts**

## Flexible Time Ranges

## Flexible Product Selection

## Reduced Waste

## Reduced Service Times
