Redefining Restaurant Management

# 2020 IT Solutions

## 2020 Cashier Touch Screen

- User friendly design
- Order history
- Left or right screen orientation
- Integrated employee time clock

The integrated time clock allows employees to “clock in” on any workstation within the restaurant, without having to exit the Point of Sale System. Detailed reporting is available which can be efficiently exported into generic formats compatible with many popular Payroll Software Suites.

- Multi-Level security codes to prevent unauthorized usage
- No need for keys or swipe cards
- Individual password security setup
- Fingerprint scanning available

The 2020 POS System has integrated Credit and Debit Card processing to consolidate all of your transactions into one easy-to-use workstation.

## 2020 Customer Display

2020 POS includes a customer display that shows leadership in the industry. This innovation is considered a key advantage of the 2020 POS solution.

- Improved order accuracy
- Reduced kitchen errors
- Full color animated 'up-selling' tool
- Right time advertising
- Can be used for promotions
- Modern corporate image

## 2020 Kitchen Display Screen

Full color kitchen displays add improved efficiency.

- Bump bar and touch screen compatible
- Chronological display
- Multiple routing options
- Flexible number of on-screen orders
- Color coded order prioritizing

## 2020 Dynamic Kitchen Prep

	NEXT 15 MIN	NEXT 30 MIN	NEXT 1 HOUR	FOLLOWING 30 MIN	FOLLOWING 1st Hour
Potatoes	2	5	8	6	11
Grilled Chicken	4	9	13	12	16
Spicy Chicken	3	7	10	7	13
Breaded Chicken	1	2	5	3	6
Nuggets	6	6	12	6	18
Strips	6	9	15	6	15

The 2020 Dynamic Kitchen Prep is fundamentally a monitor located in the kitchen area that is forecasting usage of key products based on historical averaging of sales for the same day of the week and for the same time period throughout each day.

It is directly linked to the POS System and quantities are adjusted every 10 minutes based on the current sales being rung in on the POS throughout the day, providing substantially increased accuracy of forecasts. The 2020 Dynamic Kitchen Prep is the first system of its kind that accurately predicts product usage in a LIVE environment!

## 2020 Digital Video Security

A fully integrated digital video security option is available with 2020 POS. The digital video system records all images with a limitation of hard drive space only. Internet browsers have full access to view remote site cameras.
